## Tutorials - Technical Programme

Available also as a [.PDF document](#)

Traditionally, ECOOP proposes, as part of the technical program, different tutorials during the first two days of the conference. ECOOP is well known for its high-quality and attractive tutorials. This year, the tutorial chairs have received 45 highly interesting proposals. In order to avoid extensive overlap, while still maintaining an attractive and balanced offer, 24 proposals were selected--four of them as full-day tutorials. The objective was to cover the different aspects of object-orientation, with special emphasis on the hot and novel topics. Your participation will contribute making these tutorial days a success. Tutorials have been scheduled around subjects, in order to allow participants to attend more than one tutorial. In addition, tutorial fees decrease as the number of tutorial units increases, encouraging the attendance to multiple tutorials.
