Technical programme - Workshops

available also as a [PDF document](#)

The workshops of ECOOP, Europe's foremost conference on object technology, are an excellent opportunity to bring together academics and researchers working on similar scientific areas in an atmosphere that fosters interaction, exchange, and problem solving. Workshops also provide the opportunity for representatives of a technical community to coordinate efforts and establish collective plans of action.

The ECOOP 2002 workshop committee selected 20 out of 25 high quality proposals for workshops which, as usual, are scheduled for the first two days of the conference. Your participation will contribute to making these two days a success. Enjoy them!

Workshop reader

Keeping up with the ECOOP tradition, we will again publish an *ECOOP Workshop Reader*. The ECOOP 2002 edition (expected to appear about half a year after the conference) will be published by [Springer-Verlag](#) as an [LNCS](#) volume. Each chapter of this book will be a report dedicated to one workshop, providing the current research being carried out in the workshop topics, the major issues discussed at the workshop, the conclusions of the focus groups (if applicable) and the open research directions on the workshop themes. This year, the ECOOP 2002 Workshop Reader will also include reports dedicated to panels and posters. We are pretty sure that the ECOOP 2002 Workshop Reader will provide an excellent snapshot of the trends in the object-oriented community.

You can **pre-order** a copy of the ECOOP 2002 Workshop reader on the [registration form](#) for only 48 €. This entails a discount of about 40%-50% over the estimated final price. The reader will then be shipped to the address on your registration form about half a year after the conference.

Registration

You need to be a registered participant for ECOOP'2002 in order to attend a workshop. The ECOOP registration process allows you to register for the conference (which includes workshop registration) or for the workshops only. The early registration date is May 6, 2002. Further details on conference registration are available [here](#).

Note that the ECOOP workshops are usually open only to persons who are invited or who have submitted a position paper. It is the responsibility of the registrant to check whether he or she is in the appropriate situation.

For additional questions or clarification, or for your suggestions, please feel free to contact the ECOOP 2002 Workshop Chairs:
